## **DETAILED ACTION**

### ***Election/Restriction***

1. Restriction is required under 35 U.S.C. §§ 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 C.F.R. § 1.499, Applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1 to 4, 6 to 8, 11, and 12, drawn to a mixer; and

Group II, claims 9 and 10, drawn to a mixing process.

3. The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:
4. The inventions listed as Groups I and II lack unity of invention because even though the inventions of these groups have a common technical feature, this technical feature is not a special technical feature as it does not make a contribution over the prior art in view of either Kubo *et al.* (EP 1 036 588) or Harada (EP 1 134 020), both references cited in the International Search Report (ISR) mailed 28 June 2005 and in the Information Disclosure Statement (IDS) filed 14 November 2006.
5. Applicant is advised that the reply to this Requirement to be complete must include (i) an election of an invention or species to be examined even though the Requirement may be traversed (37 C.F.R. § 1.143); and (ii) identification of the claims encompassing the elected invention.

6. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the Restriction Requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the Requirement will result in the loss of right to petition under 37 C.F.R. § 1.144. If claims are added after the election, Applicant must indicate which of these claims are readable on the elected invention or species.
7. Should Applicant traverse on the ground that the inventions have unity of invention (37 C.F.R. § 1.475(a)), Applicant must provide reasons in support thereof. Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. Where such evidence or admission is provided by Applicant, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103(a) of the other invention.
8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(i).
9. The examiner has required restriction between product and process claims. Where Applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of

the allowable product claim will be considered for rejoinder. All claims directed to a non-elected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 C.F.R. § 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. §§ 101, 102, 103, and 112. Until all claims to the elected product are found allowable, an otherwise proper Restriction Requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. M.P.E.P. § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. § 121 does not apply where the Restriction Requirement is withdrawn by the examiner before the patent issues. M.P.E.P. § 804.01.

10. A telephone call was made to Mr. W. Douglas Hahm on 27 May 2011 to request an oral election to the above Restriction Requirement, but did not result in an election being made.
